

A low vision patient complains that he can't see the TV. The best thing to do in this case:

- Give him a hand-held binocular telescope
- Give him a hand-held monocular telescope
- Prescribe spectacles-mounted binocular telescope
- Advise him to sit closer to the TV

Isoametropic hyperopia of Diopters is required to cause amblyopia.

A 60 year old woman required glasses for reading. Knowing that her distance Rx in the right eye (RE) is: -3.00-2.50 x 90 and in the left (LE): -2.00-0.75 x 180. What would be her near prescription?

- RE: -0.50 -2.50 x90 LE: +0.50 -0.75 x 180
- RE: plano -2.50 x90 LE: +1.00 -0.75 x 180
- RE: -5.50 +2.50 x180 LE: -2.75 +0.75 x 90
- RE: -1.00 +2.50 x180 LE: -1.25 -0.75 x 90
